PROADAPT celebrates 5 years of working to mobilize private sector for climate resilience. The ambition of PROADAPT was to support the development of new and innovative methodologies, tools, and business models to help small companies in Latin America and the Caribbean increase their own climate resilience and to seize related business opportunities. We are proud to share with you some of the highlight projects from our first 5 years.

On May 16 2018 PROADAPT hosted ADAPTInvest, a matchmaking event that brought together 10 startup and other companies presenting provided a unique opportunity to learn more about the priorities and interests of potential investors and to pitch their climate resilience projects and business models. The ADAPTInvest event was managed by AGORA Partnerships who works with entrepreneurs to strengthen their ability to access climate finance and to expand their impact.

The ADAPTInvest event took place within the framework of AdaptAmericas, which PROADAPT co-hosted with the Inter-American Development Bank, and which was held 15-16 May 2018 at the Hilton Panama. The ADAPTInvest event was held on May 16, 2018.

PROADAPT/Global Climate Adaptation Partnership (GCAP) partners with Global Climate Adaptation Partnership (GCAP) to finalize during the Summer of 2018.
